

## PTB project “Metrology for Digital Transformation – International Cooperation” CABUREK Global Program

**Working Group:** **WG3**  
**National project title:** **Developing a Task Manager for INM Requests (official letters)**  
**National Metrology Institute:** **INM-MD, Moldova**

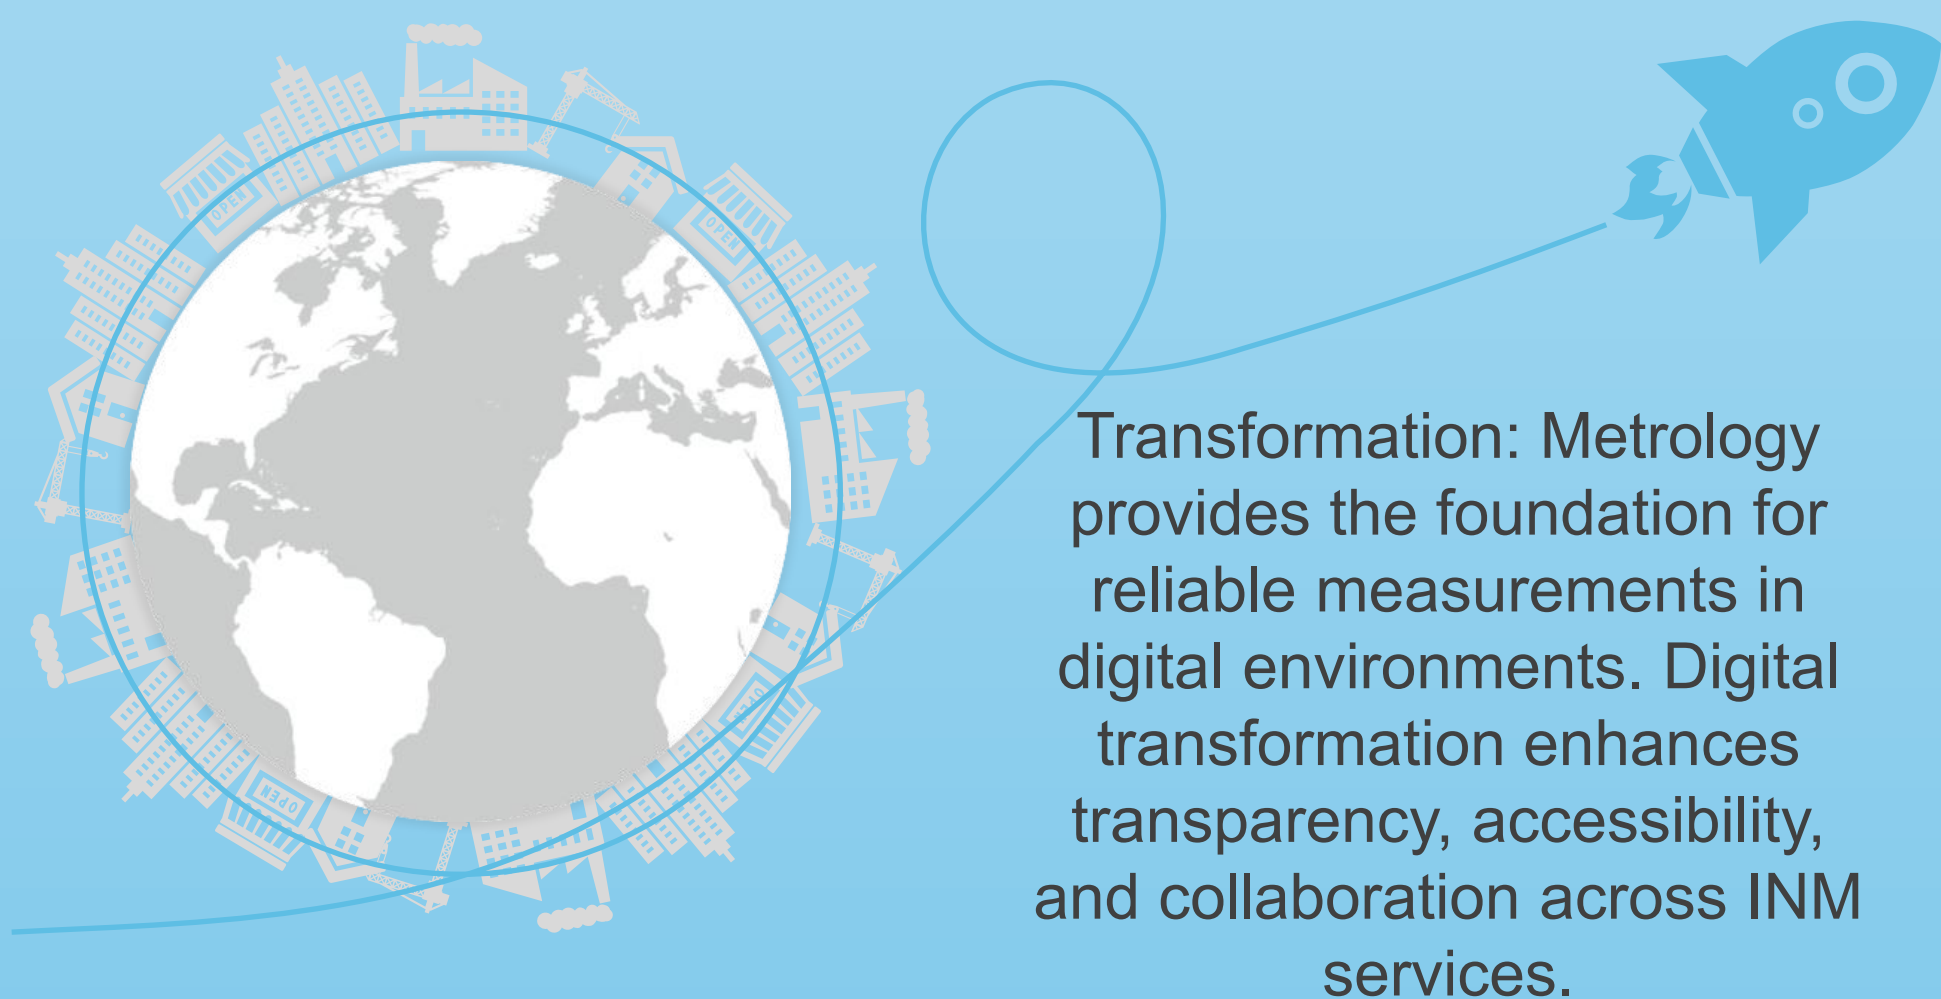

**Coach:** **PTB**

### Three key messages:

- 01** Digital tools improve the efficiency of request management.
- 02** Staff engagement ensures smooth transition to digital workflows.
- 03** Step-by-step approach helps to build sustainable digital capacities in INM-MD

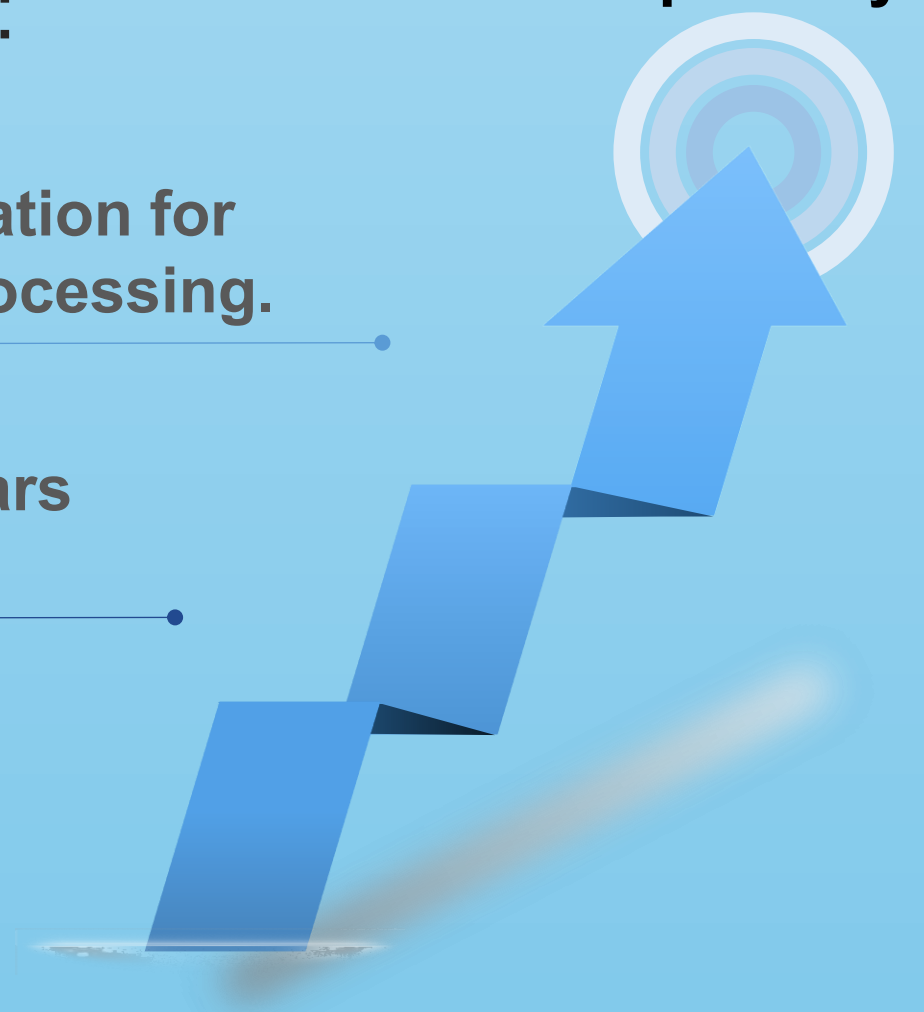

## Importance of Metrology in Digital

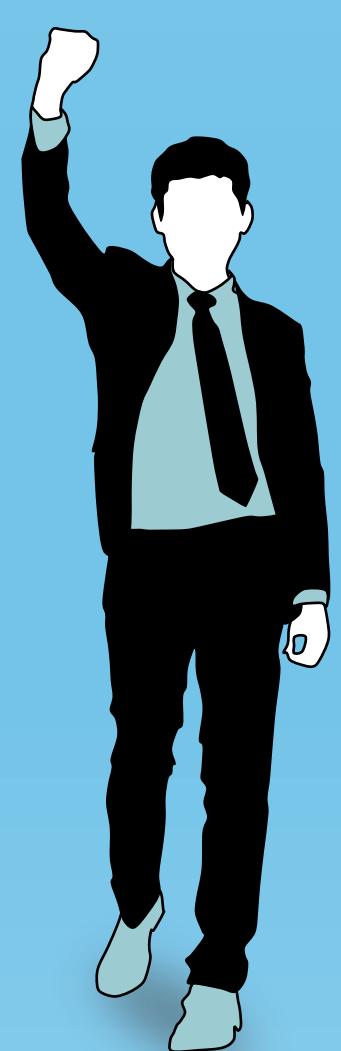

### OBJECTIVES:

-  Collect all the information for the digital request processing.
-  Organize awareness seminars for staff and stakeholders.
-  Identify resources for developing and implementing the interface

**Expected result:**  
A structured digital system for managing applications, ensuring traceability, efficiency and transparency.

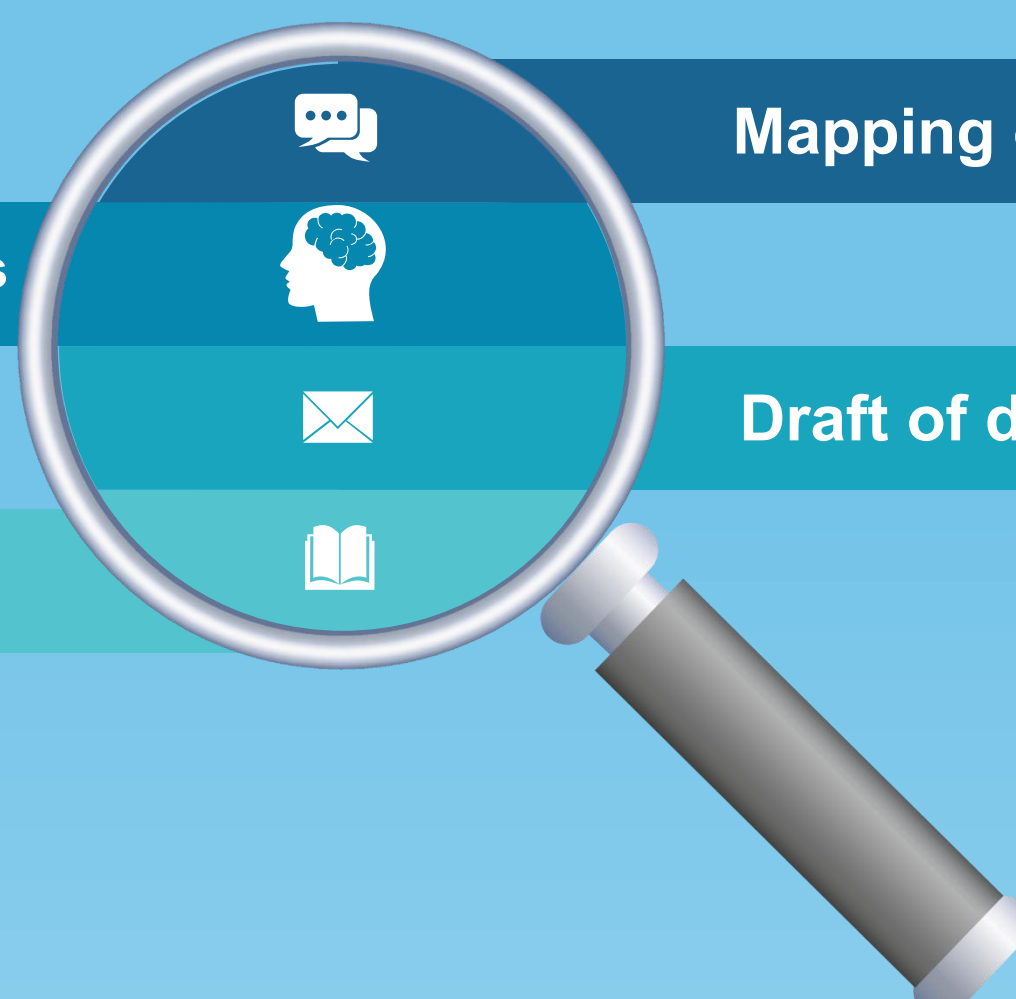

### Achievements / Progress

Increased staff readiness through awareness activities

Plan for prototype development in 2025

Mapping of existing request workflows

Draft of digital architecture (Task Manager concept)
